Warren Harley
MANAGER

City of Orangeburg Department of Public Utilities (DPU) Integrated Resource Plan

The City of Orangeburg Department of Public Utilities (DPU) owns and operates an Electric Distribution Utility (the Utility). South Carolina Code Ann. Section 58-37-40 requires a Municipal Electric Utility to prepare an Integrated Resource Plan, submit the plan to the State Energy Office, and post the plan to the Utility's website.

The Utility purchases bulk power from **Duke Energy**, the Power Supplier, through an all-requirements wholesale power purchase agreement (the Agreement). The current contract period runs from **January 1, 2024, to December 31, 2039**. The Agreement requires the Power Supplier to furnish and the Utility to purchase and receive all power required to serve the Utility's customers except for de-minimis demand-side peak-shaving generation and the power supplied from the source(s) and at the capacity listed below:

SEPA allocation capacity 15,090 kW

Under the Agreement, the Power Supplier is solely responsible for the operation, maintenance, and replacement of generation facilities, securing other supplies if necessary, and the dispatch and transmission of power delivered to meet the Agreement's requirements. The power supplied to the Utility reflects the generation portfolio of the supplier(s). During the contract period, the power supplier(s) retain the right to determine the generating facility(s) and source(s) of power delivered to meet the obligations of the Agreement.

For information on the IRP plan components required in S.C. Code Ann. Section 58-37-40 (B) (1) and (2), Refer to **Duke Energy's** integrated resource plan on file with the **South Carolina Energy Office**.
